Madison coffee table is a unique piece of furniture made of petrified wood, which is undoubtedly the most beautiful of all varieties of fossils.
Petrified wood is formed when a tree completely transforms to stone as all the organic material gets replaced by minerals. This process is called peri-mineralization. The petrifaction takes place under the ground when the wood gets buried under sediment and this process takes millions of years.
The result is a very strong material with the structure of wood.

We are proud to introduce this astonishing piece.
It has a beautiful design which is creating a warm and inviting style ...
